EDUCATION

Drexel University **Philadelphia, PA**
Bachelor of Science in Mechanical Engineering & Master of Science in Mechanical Engineering *Graduating June 2028*
Major: Mechanical Engineering || **Minor:** Computer Science
GPA: 3.82 || **Honors:** Dean's List, Performing Arts Scholarship, National Merit Finalist
Relevant Coursework: Dynamic Systems (IP), Controls, Advanced Dynamics (IP), Mechanical Behavior of Materials

SKILLS

- **Design & Analysis:** SolidWorks, AutoCAD, FEMAP, FEA, CAD/CAE
- **Hardware & Programming:** Arduino, PLC, Ignition SCADA, 3D Printing, Soldering, Python, MATLAB, VBA, Java, C

PROFESSIONAL EXPERIENCE

Thermo Systems, LLC **New York, NY**
Control Systems Co-op *March 2026 - September 2026*
- Programmed PLC ladder logic and designed SCADA interfaces for automation and control systems
- Integrated and troubleshot electrical control systems through panel wiring, schematic interpretation, PLC/HMI backups, and on-site system diagnostics
- Supported on-site acceptance testing (SAT) and commissioning to verify system functionality; prepared factory acceptance testing (FAT) documentation for hardware and software validation
- Updated AutoCAD engineering drawings to support electrical system installation and integration

Siemens Digital Industries Software **Exton, PA**
Engineer – Finite Element Analysis *March 2025 - September 2025*
- Performed finite element analysis (FEA) in FEMAP to evaluate structural stresses, deformation, and mechanical response under simulated loading conditions
- Prototyped internal interfaces to improve readability and interpretation of complex FEA output tables
- Used Python/VBScript and the FEMAP API to test software, identify defects, and provide feedback

PharmaBlock (USA), Inc. **Hatfield & West Chester, PA**
Pre-College Engineering & Laboratory Intern *Summers 2022, 2023, & 2024*
- Installed and troubleshot laboratory equipment, including chillers, reactors, and rotary evaporators
- Prototyped VBA tools to streamline equipment performance verification and QA/QC testing

LEADERSHIP AND ACTIVITIES

ASME President *July 2026 - Present*
- Design, 3D-print, and iteratively refine mechanical components for engineering workshops; maintain and troubleshoot additive manufacturing equipment
- Lead an 11-member executive board, overseeing a $10K+ annual budget and raising $1K+ in funds
- Direct 8–9 events per term, coordinating industry partnerships, technical workshops, and student sponsorships

Activities: Drexel Symphony Orchestra (First Violin), Society of Asian Scientists and Engineers (SASE)

DREXEL RESEARCH

VIP Research: Robot Balloons *January 2024 - June 2024*
- Designed and refined lightweight structural prototypes under strict mass constraints for a balloon-based robot
- Iterated balsa wood and carbon fiber prototypes, evaluating attachment methods to improve joint stability
